Item 100 Application

In addition to any other applicable tariff, the prices, charges and rules of this Tariff apply, as amended from time to time, to or from facilities served by Canadian Pacific Kansas City (CPKC). Prices in this Tariff apply as published at the time the service was rendered or the event occurs, in the currency of the country in which the service or event occurs, unless otherwise specified. The connecting railway is responsible to collect switching fees and pay CPKC for switching provided under this Tariff. For notifications of updates to this Tariff, subscribe using CPKC Customer Station.

Switch fees in this Tariff include the core Rail Direct service elements described in Tariff 1 Item 2500 (except linehaul movement from origin to destination) and are based on the two-way movement of a loaded railcar in one direction and the same railcar empty in return (or vice versa). Switch movements are subject to the terms, conditions and rates published in Tariffs 1-9, with any applicable fees assessed to the connecting railway. Some examples include:

- Asset use under Tariff 2 Items 10-15
- Intra-terminal switching under Tariff 2 Item 23 for railcars ordered but not used, which applies to empty railcars:
  - received by CPKC under switching for loading and are returned by the customer to CPKC empty
  - provided by CPKC to a connecting railway under switching for loading and are returned to CPKC empty

Item 200 Definitions

closed customer	any CPKC-served customer or facility in the United States not listed in this Tariff
connecting railway	the railway sending railcars to, or receiving railcars from CPKC for the purpose of switching
intermediate carrier	a railway that physically facilitates the interchange of railcars between two other railways
interswitching	the non-linehaul movement of a railcar in Canada between an applicable rail-served facility and a switching interchange; regulated by the Canada Transportation Agency
linehaul movement on CPKC	a revenue shipment for CPKC, with CPKC appearing in the route [e.g., CPRS-CHGO-XX]; 'revenue' refers to freight charges and does not include switching or accessorial amounts
reciprocal switching	the non-linehaul movement of a railcar in the United States between an applicable rail-served facility and the switching interchange
switching	refers to both interswitching [Canada] and reciprocal switching [United States]
switching interchange	the closest physical location to an applicable rail-served facility at which CPKC and the connecting railway can exchange railcars, unless otherwise agreed
TIH/PIH commodities	has the same meaning as defined in Tariff 8

Item 1000 Interchange Requirements

Railcars received by CPKC at interchange must be safe to travel, properly loaded and ready to move. Full shipping instructions must have been received by CPKC at or prior to the time of interchange delivery. Railcars must be delivered to the interchange indicated on the bill of lading for linehaul movement, or to the switching interchange for interswitching or reciprocal switching.

Item 11 Interchange Error

This per car fee will be assessed to the connecting railway when a railcar is offered to CPKC:

- that is unsafe or improperly loaded
- that is an empty railcar unsuitable for loading
- without full shipping instructions
- at a location other than nearest interchange to the customer, unless previously agreed
- in error, requiring CPKC to forward the railcar to the correct railway
- not completely ready to continue moving, accessible or not intended to move on CPKC

Where railcars or containers to be returned to the connecting railway are blocked beyond the original interchange point or are on a run-through train, an additional charge of $3 per mile (minimum $300 per car or $150 per container) will be assessed based on the round-trip mileage from the original interchange to the point of interchange return.

$520 UP; **$435** Other

+ **$2,200** if received for reciprocal switching of a closed customer

+ **$3** per mile (round-trip) for return of shipments blocked past interchange
$300 min per car
$150 min per container

Item 2000 Interswitching in Canada

The rules and pricing for interswitching in Canada are regulated by the Canada Transportation Agency and found in the Canada Transportation Act. Interswitching does not apply to facilities owned by CPKC, except as noted below.

Item 21 To or from a CPKC Transload in Canada

This fee is assessed to the connecting railway when CPKC handles railcars under interswitching to or from a CPKC-owned transload facility.

$3,000 per car
includes interswitching fee

Item 25 To or from a CPKC Automotive Facility in Canada

This fee is assessed to the connecting railway when CPKC handles railcars under interswitching to or from a CPKC-owned automotive facility.

$1,200 per car
includes interswitching fee

Item 3000 Reciprocal Switching in the United States

Application

The customers and facilities listed in this tariff are open to reciprocal switching for railcars, subject to the noted restrictions. For customers not listed, a linehaul movement on CPKC is required to access. Reciprocal switch fees are assessed to the connecting railway.

The prices and terms of reciprocal switching do not apply to the shipment types listed below. Such shipments require a full bill of lading [EDI 404, EDI 417 or billing through CPKC Customer Station] showing CPRS in the linehaul route:

- Dimensional loads [loads that exceed the length or width of the railcar and/or exceed 17’ 00” in height above top of rail]
- TIH/PIH commodities, as defined in Tariff 8

Reciprocal Switching performed for CPKC

When CPKC delivers a railcar to a connecting railway for reciprocal switching, CPKC will pay the applicable tariff or contractually agreed switch fee to that railway. If the switch fee is higher than the amount provisioned in the freight publication under which the CPKC linehaul was performed, CPKC may invoice the difference to the payer of freight for that shipment [e.g., the freight contract includes ‘switching up to $300’ and the actual switch fee is $500… therefore the difference is $200]. Where the freight publication is silent on the switch fee amount included in the freight rate, CPKC will absorb the switch fee.

Non-absorption of intermediate carrier switch fee

Except as otherwise agreed, switch fees assessed by an intermediate carrier between CPKC and a connecting railway apply in addition to CPKC reciprocal switch fees [e.g., switch fees for BRC and IHB as intermediate carriers between CPKC and connecting railways in Chicago].

CPKC Reciprocal Switching Fees

The following items 3100 to 7100 contain the per car reciprocal switch fees to access customers served by CPKC [Standard Carrier Alpha Code (SCAC) = CPRS]. Specific connecting railways, to which the fees are applicable, are noted as appropriate.
