# Percentage Fuel Surcharge Tariff

# 9900

**Revision 2025.1**
**Issued March 18, 2025**
**Effective May 3, 2025**

CPKC 9900 Revision 2025.1
cancels and supersedes:
CP 9900 Revision 2022.1

This document is updated periodically. Current versions of this and other CPKC tariffs are available at www.cpkcr.com.

Canadian Pacific Kansas City
7550 Ogden Dale Road SE
Calgary, AB T2C 4X9

## Application

This tariff governs fuel surcharge applied to domestic and international intermodal shipments, calculated semi-monthly based on the average On-Highway Diesel (OHD) prices posted by the U.S. Energy Information Administration (EIA). Fuel surcharge in this tariff will be applied to the freight charges in tariff publications and/or contracts that reference this tariff or its predecessor, CP 9900.

## Definitions

**Application Period** — The semi-monthly period during which each fuel surcharge update applies. Application Period 1 is from the 1st to 15th day of the month. Application Period 2 is from the 16th to the end of the month.

**Basis Period** — The period over which OHD price is averaged to determine fuel surcharge during the Application Period. Basis Period 1 is the 15 calendar days prior to 20 days preceding the 1st day of the month. Basis Period 2 is the 15 calendar days prior to 20 days preceding the 16th day of the month.

## Calculation

This tariff contains two distinct fuel surcharges:

**Intra-Canada** – *applies to shipments originating at [1] and destined to Intermodal terminals in Canada.*
When the average OHD price for the Basis Period equals or exceeds $1.25 USD per gallon, the fuel surcharge applied during the Application Period will be calculated from a base of 2.0% of the freight charge. For each incremental fluctuation of $0.035 in OHD price, the fuel surcharge will increase or decrease by an incremental 0.28% – never going below 0.00%.

**US / Cross-border** – *applies to shipments originating at [1] or destined to Intermodal terminals in the United States or Mexico.*
When the average OHD price for the Basis Period equals or exceeds $1.25 USD per gallon, the fuel surcharge applied during the Application Period will be calculated from a base of 2.0% of the freight charge. For each incremental fluctuation of $0.035 in OHD price, the fuel surcharge will increase or decrease by an incremental 0.35% – never going below 0.00%.

The average OHD price for a Basis Period is the simple average of all OHD prices posted on dates within that period, inclusive. The source for OHD pricing is the EIA's Weekly Retail Diesel Prices, available at:
https://www.eia.gov/dnav/pet/pet_pri_gnd_dcus_nus_w.htm [Diesel (On-Highway) - All Types].

## Reference

A schedule of Tariff 9900 fuel surcharge levels is available at: https://www.cpkcr.com/en/customer-resources/pricing-and-tariffs. Those subscribing to this tariff in CPKC Customer Station will receive an email notification of updates.

1. For steamship line containers moving in the Domestic Repositioning Program (DRP), the origin terminal will be the terminal at which the steamship line provided the empty container for DRP use.
