Introduction

Application *Item 1*

In addition to any other applicable tariff, the prices, charges and rules of this Tariff apply, as amended from time to time, to or from facilities served by Canadian Pacific (CP). Prices in this Tariff apply as published at the time the service was rendered or the event occurs, in the currency of the country in which the service or event occurs, unless otherwise specified. The connecting railway is responsible to collect switching fees and pay CP for switching provided under this Tariff. For notifications of updates to this Tariff, subscribe using [CP Customer Station](#).

Definitions *Item 2*

closed customer	any CP-served customer or facility in the United States not listed in this Tariff
connecting railway	the railway sending railcars to, or receiving railcars from CP for the purpose of switching
intermediate carrier	a railway that physically facilitates the interchange of railcars between two other railways
interswitching	the non-linehaul movement of a railcar in Canada between an applicable rail-served facility and a switching interchange; regulated by the Canada Transportation Agency
linehaul movement on CP	a revenue shipment for CP, with CP appearing in the route [e.g. CPRS-CHGO-XX]; 'revenue' refers to freight charges and does not include switching or accessorial amounts
reciprocal switching	the non-linehaul movement of a railcar in the United States between an applicable rail-served facility and the switching interchange
switching	refers to both interswitching [Canada] and reciprocal switching [United States]
switching interchange	the closest physical location to an applicable rail-served facility at which CP and the connecting railway can exchange railcars, unless otherwise agreed
TIH/PIH commodities	has the same meaning as defined in Tariff 8

What's included *Item 3*

Switch fees in this Tariff include the core Rail Direct service elements described in [Tariff 1](#) Item 25 (except linehaul movement from origin to destination) and are based on the two-way movement of a loaded railcar in one direction and the same railcar empty in return (or vice versa).

Switch movements are subject to the terms, conditions and rates published in [Tariffs 1-9](#), with any applicable fees assessed to the connecting railway. Some examples include:

- Asset use under Tariff 2 Items 10-15
- Intra-terminal switching under Tariff 2 Item 23 for railcars ordered but not used, which applies to empty railcars that are:
 - received by CP under switching for loading and are returned by the customer to CP empty
 - provided by CP to a connecting railway under switching for loading and are returned to CP empty

Interchange errors *Item 10*

Railcars received by CP at interchange must be safe to travel, properly loaded and ready to move. Full shipping instructions must have been received by CP at or prior to the time of interchange delivery. Railcars must be delivered to the interchange indicated on the bill of lading for linehaul movement, or to the switching interchange for interswitching or reciprocal switching.

\$435 per car
other than UP

\$520 per car
UP

+ **\$2200** per car if received
for reciprocal switching of a
closed customer

Interchange error *Item 11*

This fee will be assessed to the connecting railway when a railcar is offered to CP:

- that is unsafe or improperly loaded
- that is an empty railcar unsuitable for loading
- without full shipping instructions
- at a location other than nearest interchange to the customer, unless otherwise agreed in advance
- in error, requiring CP to forward the railcar to the correct railway
- that is not completely ready to continue moving, accessible or not intended to move on CP

Interswitching in Canada *Item 20*

The rules and pricing for interswitching in Canada are regulated by the Canadian Transportation Agency [<https://www.otc-cta.gc.ca/eng/home>] and found in the Canadian Transportation Act [<https://laws-lois.justice.gc.ca/eng/regulations/sor-88-41/>]. Interswitching does not apply to facilities owned by CP, except as noted below:

\$3,000 per car
Includes interswitching fee

To / from a CP transload *Item 21*

This fee is assessed to the connecting railway when CP handles railcars under interswitching to or from a CP-owned transload facility.

\$1,200 per car
Includes interswitching fee

To / from a CP automotive facility *Item 25*

This fee is assessed to the connecting railway when CP handles railcars under interswitching to or from a CP-owned automotive facility.

Reciprocal switching in the United States Item 30

Application

The customers and facilities listed in this tariff are open to reciprocal switching for railcars, subject to the noted restrictions. For customers not listed, a linehaul movement on CP is required to access. Reciprocal switch fees are assessed to the connecting railway.

The prices and terms of reciprocal switching do not apply to the shipment types listed below. Such shipments require a full bill of lading [EDI 404, EDI 417 or billing through [CP Customer Station](#)] showing CPRS in the linehaul route:

- Dimensional loads [loads that exceed the length or width of the railcar and/or exceed 17' 00" in height above top of rail]
- TIH/PIH commodities [defined in [Tariff 8](#) Item 2]

Reciprocal switching performed for CP

When CP delivers a railcar to a connecting railway for reciprocal switching, CP will pay the applicable tariff or contractually-agreed switch fee to that railway. If the switch fee is higher than the amount provisioned in the freight publication under which the CP linehaul was performed, CP may invoice the difference to the payer of freight for that shipment [e.g. the freight contract includes "switching up to \$300" and the actual switch fee is \$500... therefore the difference is \$200]. Where the freight publication is silent on the switch fee amount included in the freight rate, CP will absorb the switch fee.

Non-absorption of intermediate carrier switch fee

Except as otherwise agreed, switch fees assessed by an intermediate carrier between CP and a connecting railway apply in addition to CP reciprocal switch fees [e.g. switch fees for BRC and IHB as intermediate carriers between CP and connecting railways in Chicago].

Reciprocal switch fees on CP

IA, Camanche		Item 31A
