“Reducción del Descuento” en la tarifa por la variación en el precio del combustible para CPKCM

CPKC de México (CPKCM) evalúa los cargos por combustible a partir de la distancia que recorre su flete. A continuación, proporcionamos la información más reciente sobre la Reducción del Descuento de la tarifa por la variación en el precio del combustible (RDD).

- Para calcular la RDD a partir de la distancia se multiplica el factor por milla por la distancia recorrida en la ruta, como se señala en Contrato de Prestación de servicios de transporte ferroviario de carga (Publicación sobre las Reglas de CPKCM) a partir del precio del combustible publicado por PEMEX para la TAR Irapuato, antes de IVA.
- El recargo por combustible basado en el porcentaje de los ingresos se calcula multiplicando un porcentaje determinado basado en la terminal Pemex TAR Irapuato, antes del IVA y los tipos de cambio asociados derivados del Banco de México

Los documentos asociados se pueden encontrar en la página CPKCR.com Precios y Tarifas en la pestaña CPKCM.
